PROFILE

Im a passionate Front-end Web Developer with a love for creating beautiful and user-friendly web experiences. My journey has led me to explore modern frameworks like ReactJS and tools like Figma for seamless design-to-development collaboration. I'm dedicated to continuous growth, always eager for new challenges, and excited to be a part of the ever-evolving world of web development. Let's connect and build something amazing together! where I post useful content related to Web Development and Programming

---

WORK EXPERIENCE

UAIMS |Freelance Project   September 2023

Front-end, Q.A

- **University Athlete Information Management System** I work as a front-end developer and quality assurance specialist. I focus on making our applications look and work well, all while diligently testing to maintain quality and user satisfaction. My combined role helps in creating reliable and user-friendly software.

GCMS l Freelance Project

September 2023

Front-end, Q.A

- **Guidance and Counseling Management System** I focus on front-end development. I'm responsible for creating the visual and interactive elements of our applications, ensuring they look great and function smoothly.
- Discovering Bugs and need to fixed it.

SFMS | Capstone Project

Front-end , Q.A   2022- 2023

- **Student File Management System** In our capstone project, I do two jobs: design the user interface and test the project for any issues. This helps ensure a polished and reliable final product.

WORK EXPERIENCE

Frontend Developer, UI UX Intern

LightWeight GlobalTech Solution   **2024**

- UI/UX design-focused front-end development internship sought by a committed and motivated candidate. keen to expand my skill set and deepen my understanding of the industry by using my skills of web design and development to exciting projects in a meaningful way.

Mobile Application
Frontend Developer, Intern

LightWeight globalTech Solution

- Working on the Mobile Application with Payment Gateway as a frontend developer, I've been crucial in creating a smooth and effective system that allows customers to conveniently pay their power bills. Bill payment is revolutionized by or Mobile App, which provides a variety of online payment choices such as credit and debit cards, GCash, and Maya, along with an intuitive UI.

Major Contributions:

- Payment Gateway Mobile app's frontend architecture was designed and implemented in conjunction with the development team using React Native, guaranteeing a seamless and responsive user experience across a range of devices.
- The ability for users to safely and simply select their preferred payment option by integrating a number of online payment gateways inside the app.
- Enhanced the app's visual appeal and usability in close collaboration with UI/UX designers to make sure that it is accessible to all users and has simple navigation.
